

Community Health Status Indicators

CHSI 2009

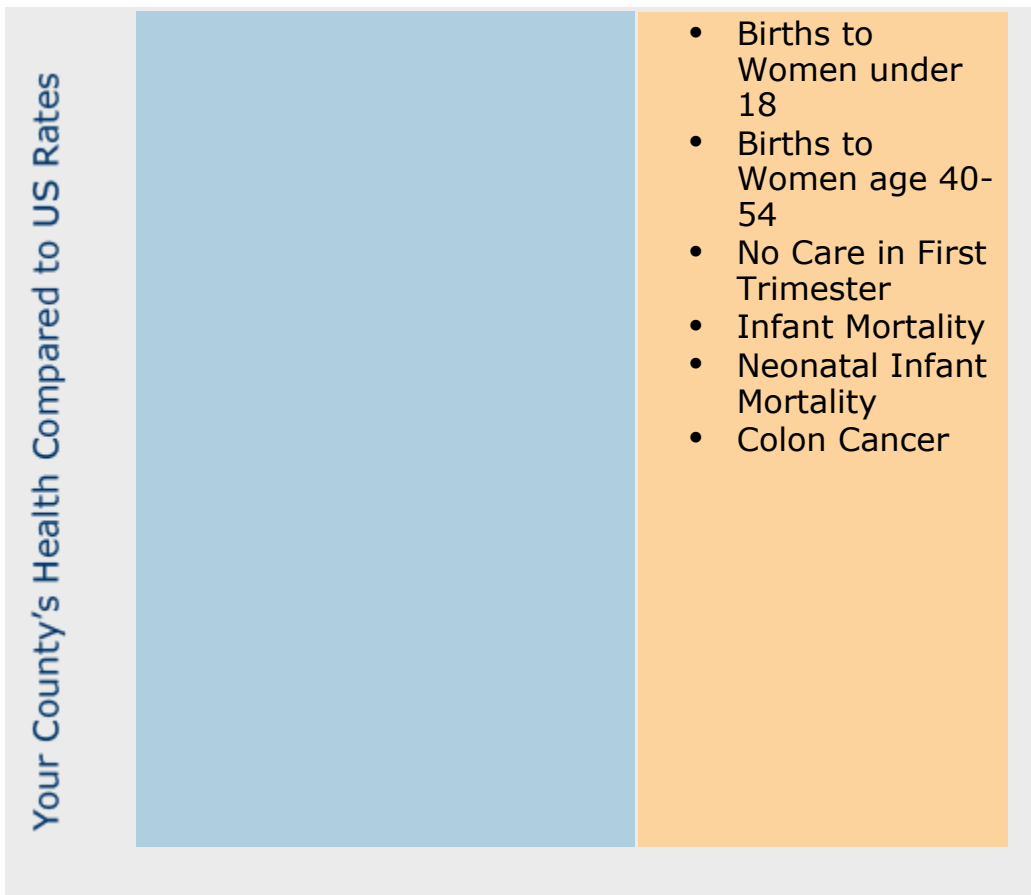

Our Mission: Provide Information for Improving Community Health

Relative Health Importance: Brown County, OH

 Indicates a status favorable to peer county median value

 Indicates that a closer look and perhaps reduction to the percent or rate may be needed. Blank indicates no comparison.

Your Health Status Compared to Peers		
	UNFAVORABLE	FAVORABLE
UNFAVORABLE	<div></div> <ul style="list-style-type: none">• Post-neonatal Infant Mortality• Breast Cancer (Female)• Coronary Heart Disease• Lung Cancer• Stroke• Suicide	<ul style="list-style-type: none">• White non Hispanic Infant Mortality• Motor Vehicle Injuries
FAVORABLE	<ul style="list-style-type: none">• Low Birth Wt. (<2500 g)• Births to Unmarried Women• Unintentional Injury	<div></div> <ul style="list-style-type: none">• Very Low Birth Wt. (<1500 g)• Premature Births (<37 weeks)

The Relative Health Importance table creates four categories of relative concern by simply comparing a county to its peers and to the U.S.

A county's indicators in the Unfavorable/Unfavorable Quadrant (🔍) are higher than the U.S. and its peers and may warrant more attention. Conversely, indicators in the Favorable/Favorable Quadrant (🍏) of the table compare favorably to both peers and the U.S. The other boxes represent intermediate levels of health where a county's rate is higher than either its peers or the U.S., but not both.
